

### MANUAL STACKER MODEL NO. MST

Patron manual stacker is a versatile lifting device designed for efficient vertical movement of palletized loads in warehouses, factories, and other industrial settings. Operated manually, it typically features forks that slide under pallets, a lifting mechanism controlled by a manual pump, and a set of wheels for easy maneuvering. With a focus on simplicity and cost-effectiveness, manual stackers are ideal for lifting, lowering, and transporting pallets to different heights, facilitating space optimization and streamlined material handling.

#### SPECIFICATION & FEATURES

- Material : Sturdy Steel
- Load Capacity : 1000 KGS.
- Size : 910 X 610 X 890 MM
- Max Lifting Height : 1600 MM
- Fork Size : 550 x 1150 MM
- **Low Maintenance:** Requires minimal maintenance, contributing to overall cost efficiency.
- **Affordability :** Manual stackers are generally more cost-effective compared to powered alternatives.
- **Multi-Purpose Use :** Suitable for a variety of lifting and stacking tasks in warehouses and industrial environments
