

## **EYE PROTECTION**

PERSONAL PROTECTIVE EQUIPMENT

## GW 250- SAFETY WELDING GOGGLES MODEL NO. E5

This protective eyewear is best used for protection against flying small fragments, liquid splashes, fumes, sparks, etc. It is designed to protect the eyes exposed to medium-level impacts, making it ideal for light and medium gas welding and cutting, torch brazing spot welding, soldering, and welding observation. With its flip-on type plastic lens, soft impact, and splash protection, it offers a comfortable fit for long-term wearing. The shade 5 lens and venting system help protect the eyes from harmful UV light while circulating air to prevent dust. The fully adjustable headband and universal fit nose bridge ensure a comfortable fit for most users, and the soft frame conforms to facial contours, making it ideal for prolonged use. This protective eyewear is a reliable and durable solution for various work environments that require eye protection.

## **SPECIFICATION**

- •Flip-on type plastic lens with soft impact & splash protection around the eyes
- ·Lens filters out 99.9% of harmful UV light
- •Fully adjustable headband attached to fits most users
- •Soft frame conforms to facial contours for a very comfortable fit to ensure for long time wearing Shade 5 lens
