

WELDING HELMET - AUTO DARKNESS MODEL NO. H3A

The Automatic Welding Helmet is a reliable and indispensable tool for any welder operating welding machines. Its auto-darkening filter, flip-up design, durability, and compliance with safety standards make it the perfect choice for any welding job.

SPECIFICATION

- Auto-darkening filter adjusts to welding arc brightness for maximum protection against harmful UV and IR radiation.
- Flip-up design allows for easy transitions between welding and grinding tasks.
- Durable materials withstand tough welding jobs.
- Lightweight and comfortable design for extended use without causing fatigue or discomfort.
- Adjustable headband for a secure and customizable fit.
- Compliant with CE EN 379, ANSI Z87.1
